

6094
Mint of the United States at New Orleans, La.,
Superintendent's Office,

Jan'y 3^d 1886.

Hon. Horatio C. Burchard,

Director of the Mint.

Sir:

I transmit herewith the design
furnished me by the Secretary of the
"World's Industrial and Cotton Centennial
Exposition" Management for their Souvenir
Medal.

They desire that the medals shall
be of two sizes - viz - of the quarter and half
dollar: that the composition as nearly

as possible resemble polished gold and silver. The reverse die, on which is the "Souvenir" should have the letters in the word correspond in height to the dotted line on the sketch.

The management request that you will order the planchets ready to stamp - if possible; if not, then the strips; the purchase of the strips may entail the loss of all clippings.

They desire a sufficient number to strike 100,000; that is 50,000 of each denomination in the two colors. It is further suggested, that if the engraver can add

a scroll or beaded edge next to the wreath and inside the rim, similar to the work on the S. S. Dollar as shown here -  to do so.

The Committee state that they were informed that the Department would furnish these dies free of cost - in consideration of the fact that the management would put up a special building for the "Life Saving Service", - which they are doing, and for the further reason that the medals were to be of a National character and for a National purpose; but, if there is to be any expense, to inform them through me - at an early date,

and a check for the amount would be given.

I informed them that the Department could not guarantee the payment of the strips or planchets to be furnished; they replied, if you will forward a bill a check for the amount will be deposited to the credit of the parties furnishing them.

Very respectfully,

H. P. Lawver,

Assayer Mint Bureau.

The Mint of the United States at New Orleans, La.,

SUPERINTENDENT'S OFFICE,

January 3rd, 1885.
